

Author Index for Volume 22

- Bastin, G. F., 161
Belen, N., 227
Bennett, M. J., 291
- de Kok, P. M. T., 147
Desport, J. A., 291
Douglass, D. L., 45
- Gilewicz-Wolter, Jolanta, 101
Godlewska, E., 117
Godlewski, K., 117
- Harrison, P. L., 35
Hurd, T. J., 201
- Kowalska, Krystyna, 101
- Labun, P. A., 291
- Metselaar, R., 161
Misra, A. K., 1
- Narita, T., 181
- Petkovic-Luton, R., 83
- Raghavan, M., 83
Rahmel, A., 59
Ramanarayanan, T. A., 83, 133, 247
- Schorr, M., 59
Smeltzer, W. W., 181
Strolovitz, D. J., 132, 247
- Tatlock, G. J., 201
Tomaszewicz, P., 227
- Van Beek, J. A., 147, 161
Van Loo, F. J. J., 147, 161
- Whittle, D. P., 1
Wu, M. Z., 45
Wu, W. T., 59
- Young, D. J., 227

Subject Index for Volume 22

- Alumina scales, effect of yttrium, 83
Aluminide coatings, corrosion in Na_2SO_4 ,
 role of platinum, 59
Aluminum, effect of on oxidation of cast
 25Cr-35Ni steel, 227
Analytical electron microscopy, use of to
 study selective oxidation, 291
- Chromaluminizing, of nickel and nickel
 alloys, 117
Cobalt, SO_2 corrosion, 101
Cu-Ni-S alloys, displacement reactions, 147
- Elastic stress analysis, of scales during
 growth, 133
- Fe-23.4Cr-18.6Al alloy, sulfidation, 181
Fe-Ni-S alloys, displacement reactions, 147
- Gibbs-Duhem equation, use of in solid solu-
 tion oxides, 277
Growth stresses, elastic analysis of during
 scale growth, 133
- Heterovalent cations, oxide solutions, 277
Homovalent cations, oxide solutions, 277
- Isotopes, ^{18}O and ^{35}S , use of to study cobalt
 corrosion in SO_2 , 101
- Morphology, of displacement reactions, 161
Multiphase oxide scales, 35
- Na_2SO_4 , corrosion of aluminide coatings, 59
 Na_2SO_4 , corrosion of nickel, 1
Ni-Cr-Mo, sulfidation behavior, 45
Nickel, chromaluminizing, 117
Nickel, Na_2SO_4 -inducing corrosion, 1
Nickel superalloy, effect of Pt on oxidation,
 201
- Platinum, effect of on Ni superalloy oxida-
 tion, 201
Platinum, role of in Na_2SO_4 corrosion of
 aluminide coatings, 59
P-type oxide, application of Gibbs-Duhem
 equation to solid solutions, 277
- Selective oxidation, in 20Cr-25Ni-Nb steel,
 study of by electron microscopy, 291
 SO_2 and SO_3 , effect of on Na_2SO_4 corrosion
 of nickel, 1
Solid State displacement reactions, Fe-Ni-S
 and Cu-NiS systems, 147
Solid State displacement reactions, layer
 sequence, 161
Stainless steel, cast 25Cr-35Ni, effect of
 aluminum on oxidation, 227
Stainless steel, 20Cr-25Ni-Nb, selective oxi-
 dation, 291
Sulfidation, Ni-Cr-Mo alloys, 45
Sulfidation, Fe-23.4Cr-18.6Al alloy, 181
- Thermochemical diagrams, metal-oxygen-
 sulfur systems, 247
- Yttrium, effect of on Al_2O_3 scales, 83

Instructions to Contributors

1. Manuscripts should be sent to:

Prof. D. L. Douglass
Materials Department
Room 6531, Boelter Hall
University of California at Los Angeles
Los Angeles, California 90024

2. Submission is a representation that the manuscript has not been published previously and is not currently under consideration for publication elsewhere. A statement transferring copyright from the authors (or their employers, if they hold the copyright) to Plenum Publishing Corporation will be required before the manuscript can be accepted for publication. The Editor will supply the necessary forms for this transfer. Such a written transfer of copyright, which previously was assumed to be implicit in the act of submitting a manuscript, is necessary under the new U.S. Copyright Law in order for the publisher to carry through the dissemination of research results and reviews as widely and effectively as possible.
3. Type double-spaced, and submit the original and two copies (including, where possible, copies of all illustrations and tables).
4. An abstract of 150 words or less is to be provided.
5. A list of 4-5 key words is to be provided directly below the abstract. Key words should express the precise content of the manuscript, as they are used for indexing purposes, both internal and external.
6. Illustrations (photographs, drawings, diagrams, and charts) are to be numbered in one consecutive series of Arabic numerals. The captions for illustrations should be typed on a separate sheet of paper. Photographs should be large, glossy prints, showing high contrast. Drawings should be prepared with india ink. Either the original drawings or good-quality photographic prints are acceptable. Identify figures on the back with author's name and number of the illustration.
7. Tables should be numbered and referred to by number in the text. Each table should be typed on a separate sheet of paper.
8. References should be made by using superscript Arabic numerals, and the full references should be given in a list at the end of the paper. For maximum clarity, abbreviations should be avoided in the references. Whenever a book is cited, the number of the relevant chapter should be given.
9. In general, *Oxidation of Metals* follows the recommendations of the American Institute of Physics in their *Style Manual*, and it is suggested that contributors refer to this publication.
10. **The journal makes no page charges.** Reprints are available to authors, and order forms are sent with proofs.

OXIDATION OF METALS

Vol. 22, Nos. 5/6

December 1984

CONTENTS

Platinum and the Oxidation Behavior of a Nickel Based Superalloy <i>G. J. Tatlock and T. J. Hurd</i>	201
Effects of Aluminum on the Oxidation of 25Cr-35Ni Cast Steels <i>N. Belen, P. Tomaszewicz, and D. J. Young</i>	227
Thermochemical Diagrams for Metal-Oxygen-Sulfur Systems: An Aid in Corrosion Research <i>D. J. Srolovitz and T. A. Ramanarayanan</i>	247
Application of Gibbs-Duhem's Equation to a Pure P-Type Semicon- ducting Oxide and to Its Solid Solutions with Oxides Containing Homovalent or Heterovalent Cations <i>F. Gesmundo</i>	277
Analytical Electron Microscopy of a Selective Oxide Scale Formed on 20%Cr-25%Ni-Nb Stainless Steel <i>M. J. Bennett, J. A. Desport, and P. A. Labun</i>	291
Author Index to Volume 22	307
Subject Index to Volume 22	309
